

PGS 123 GALVANIC

Simple, effective and user friendly. The PGS-123 Galvanic Analog Stimulator delivers HVPGS (High Voltage Pulsed Galvanic Stimulation) direct current via a very unique twin-peak monophasic waveform that has been proven extremely effective for wound healing, edema reduction and pain relief.

- **PGS-123 Galvanic Analog**
- **Channel: Single Channel, with 1 Dispersive and 2 Active Leads**
- **Output Voltage: 0 to 240 Volts (Single Channel 500 Ohm load) 0 to 350 Volts (Open Circuit)**
- **Waveform: Twin Peak Monophasic**
- **Polarity: Positive or Negative Wave Form**
- **Output Mode: Alternating or Continuous Treatment Mode Switch**
- **Pulse Rate: Adjustable Frequency (2 - 100 Hz)**
- **Pulse Width 5 μ S (Fixed)**
- **Power Supply: AC Wall Adapter and 9v Battery Power Supply**
- **LED Output Indicator**
- **Durable Metal Belt Clip**
- **1-Year Warranty**
- **Includes: 2 each 4 x 7" Self-Adhesive Dispersive Electrode, 1 Package of Self-Adhesive Electrodes, 1 each 36" Single-Lead Dispersive Lead Wire, 1 each 36" 2-Lead Active Lead Wire, 1 each 9 Volt Heavy Duty Battery, AC Adapter, Carrying Case, and Instruction Manual**
- **Private Labeling Available (carrying case only)**
