

SR 100 CERVICAL SPINAL-AIR TRACTION COLLAR

There are many types of bracing that have been developed over the years for the cervical spine, however, Spinal Rehab Solutions brings to you an entirely new concept to assist in the treatment of cervical neck pain

The cervical spine is an amazing and complex structure of 7 small vertebrae, intervertebral discs to absorb shock, joints, 8 nerve roots, vascular elements, 32 muscles, ligaments and it is also home to the spinal cord.

It is capable of supporting a head weighing 15 or more pounds while moving in several directions. No other region of the spine has such freedom of movement which makes the mobility of the neck matchless.

This combination of complexity and mobility, make the neck susceptible to pain and injury.

The SR 100 Cervical Spinal-Air Traction Collar is a revolutionary orthopedic traction instrument that reduces the pressure on the cervical discs by widening of the intervertebral disc space through the use of air pressure. Scientifically designed air cells inside the SR 100 collar expand the device vertically to apply a traction force to the cervical spine. This traction force or unloading of the discs can quickly provide significant pain relief for neck pain. Users will feel immediate support as well as providing maximum comfort.

The longitudinal expansion system of the SR 100 helps reduce intra-discal pressure within the cervical spine. Researchers have scientifically identified proven benefits for patients challenged with bulging discs, herniated discs, degenerative discs and radiculopathy in the arms with as little as two 30 minute treatments per day.

Features of the SR 100

- *Pain Relief For Bulging Disc, Herniated Discs, Degenerative Disc Disease And Radiculopathy In The Arms*
- *Advanced Tubeless Air Cell Design*
- *Waterproof, Moisture Proof Resistant Material For Machine Washing*
- *Minimize Pain/ Reduce Pain Medication*

Treatable Symptoms:

- *Cervical Pain Syndrome*
- *Pinched Nerve*
- *Cervical Radiculopathy*
- *Herniated Disc*
- *Bulging Disc*
- *Degenerative Disc Disease*
- *Chronic Neck Pain*
- *Chronic Migraine*
